1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on **a separate sheet within the range of 50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. Claims 1, 2, 4-10, 13-18, 20-26, 29-32 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4, 6-12, 15-18, 41-44, 46-52, 55-58 of copending Application No. 10/521,999. Although the conflicting claims are not identical, they are not patentably distinct from each other because by broadly interpreting the term of "trunk pipe" as the claimed "aggregate pipe", "flow TX framer" as the claimed "tributary TX framer", "destination flow determining module" as the claimed "destination tributary determining module", and "flow RX framer" as the claimed "tributary RX framer", claims 1-4, 6-12, 15-18, 41-44, 46-52, 55-58 of copending Application No. 10/521,999 claim the same invention as claims 1, 2, 4-10, 13-18, 20-26, 29-32 of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re*

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

4. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, claim 17, line 3, each term of "XP (processing protocol)" should be changed to -- XP processing protocol -- for proper claim language recitation for claim limitation.

In claim 12, line 1, claim 28, line 1, each term of "said MSR" lacks antecedent basis.

In claim 26, line 1, "claim 7" should be changed to -- claim 23 -- for proper claim dependency.

6. Claims 3, 11, 12, 19, 27 and 28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bigham et al. '161, '799 & '056 are all cited to show the common feature of multiple service ring network for data transmission among ring nodes similar to the claimed invention.

Matsumoto et al. '298 & '446, Nigam et al., McCann et al., Goode et al., Shpak et al., Omran, and May et al. are all cited to show dual ring SONET system for transmitting data packets with data conversion and encapsulation similar to the claimed invention.
